Employees	1,200
Founded Year	2015

3. AI-Generated SWOT Analysis

Strengths:
• Dominant market position in Artificial Intelligence & LLMs
• Advanced proprietary technology stack: Transformer Architecture, RLHF, Deep Neural Networks

Weaknesses:
• High dependency on specialized hardware supply chains
• Intense competition from emerging AI labs

Opportunities:
• Expansion into global enterprise software contracts
• Strategic acquisitions of niche AI startups

Threats:
• Regulatory scrutiny on AI and market consolidation
• Macroeconomic volatility affecting enterprise IT budgets
